

Hummingbird BirdsEye Workstation Management Software

BirdsEye Workstation Management Software simplifies mobile workstation control, minimizes administration, and enhances asset management. Scalable from Standalone (on-client) to Connected to meet your facility's changing needs.

- Features:**
- Streamlines clinical efficiency
 - Provides real-time status of all workstations in your fleet
 - Integrated data tracking and analysis to maximize uptime
 - Optimizes service caseload
 - Reduces total cost of ownership

BirdsEye Software Plans

		Lite	Connected	Connected+
		Standalone (On-Client) critical alerts and battery status	Standalone + Secure Connected workstation management	Standalone + Connected workstation management + analytics
User	Cart battery-level display	●	●	●
	Low-battery indicator and alert	●	●	●
	Time-to-charge indicator	●	●	●
	Wall-outlet connection indicator with movement while connected alert	●	●	●
	Utilize existing user names and passwords for cart access		●	●
	Ticketing system (send message to IT support)		●	●
Administration and Maintenance	Battery Protection System (battery recovery, automatic cart shutdown, adaptive charging)	●	●	●
	Battery power output selection and indicator (DC volts and DC amps)	●	●	●
	Battery temperature indicator	●	●	●
	Routine maintenance alerts with diagnostic tools	●	●	●
	Event log	●	●	●
	Cart alarm status alert email notifications		●	●
	Secure, network-based administration		●	●
	Receive critical alerts, messaging, and notifications via dashboard		●	●
	Reboot and admin via remote desktop client integration		●	●
	Cart location tracking system		●	●
Management	On-client / cart metrics	●	●	●
	Enhances asset management capability for balanced runtime, extended battery life, and smart asset deployment	●	●	●
	Detailed metrics and analytics by cart and aggregate			●
	Amico-supported asset management with fleet optimization service			●
